

**SUPPLEMENTAL TABLE 1.** Comparison of diagnostic criteria for the FH (from McGowan et al, 2019)

<b>Criteria</b>	<b>MedPed</b>	<b>Dutch</b>	<b>Simon Broome</b>	<b>NLA</b>	<b>AHA</b>
Family history of premature CAD		+	+	+	+
Family history of tendon Xanthomonas		+	+		
Family history of hypercholesterolemia	+	+	+	+	
Patient premature CAD		+		+	
Patient premature PVD		+			
Tendon Xanthomonas		+	+	+	
Corneal arcus		+		+	
Elevated LDLc	+	+	+	+	+
Genetic mutation		+	+	+	+

AHA: American heart Association, CAD: coronary artery disease, FH: familial hypercholesterolemia, LDLc: low density lipoprotein cholesterol, MedPed: make early diagnosis to prevent early death, NLA: National lipid association, PVD: peripheral vascular disease
